

# Chatbot Steve

---

Steve Chatbot is a C program designed to have a conversation with you. He runs inside your terminal. Steve, currently, is not an app with a visual interface.

Steve, a human-like chatbot designed to have conversations.

## Installation

---

1. Go to [My Github installation page](#) to install chatbot
2. After you go there if you have a computer which supports the .exe format, download and run the .exe installer and follow the steps on your screen. If your computer doesn't support the .exe format skip to step 3
3. Expand Assets for the newest version of Steve (the one on the top) then click on the file with a .c extension
4. Save the file on your desktop
5. \*make sure you have GCC on your terminal for the next step(s)\*
6. Open your terminal (also known as command prompt on Windows)
7. Type the command `cd Desktop` or if you get an error message type `cd desktop` to change directories to your desktop
8. Type `gcc chatbot.c` to compile the C program
9. Type `clear` or `cls` to clear the screen
10. Type `./a.out` or `a.exe` to run the program

## Help

---

You can ask questions to Steve in three different ways: (in this example I will use the question "What is your name")

1. "What is your name?"
2. "What is your name"
3. "what is your name?"
4. "what is your name"

Notice the difference in capitalization and punctuation in the examples above

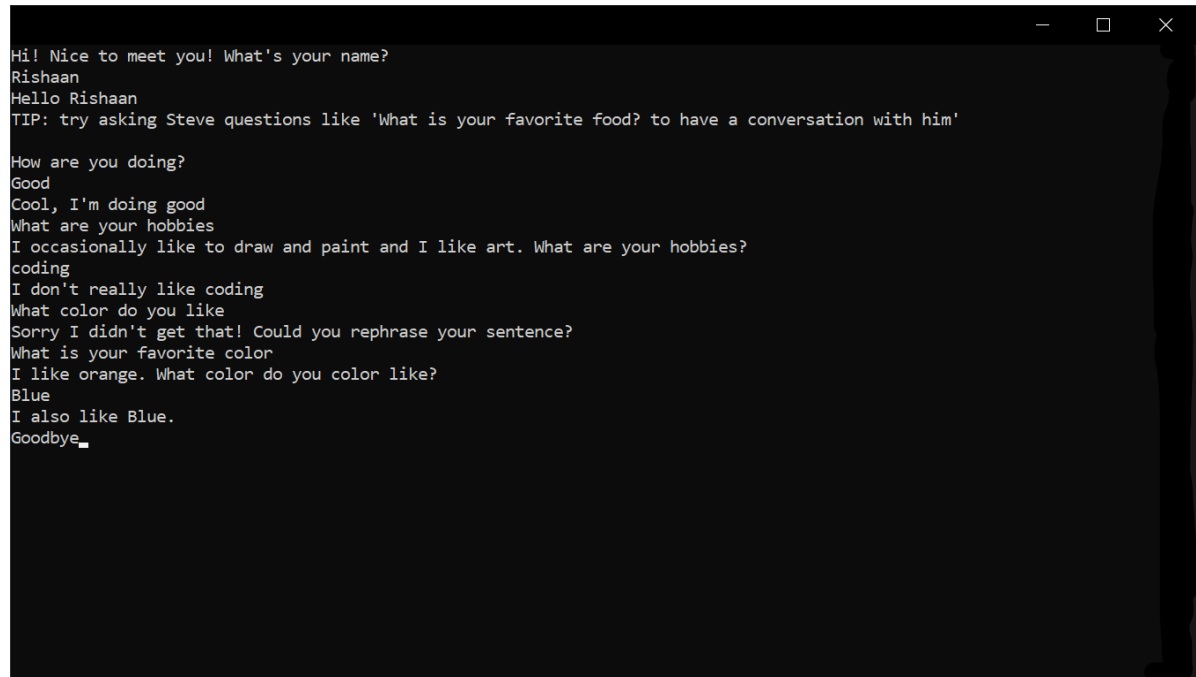

If Steve is not working properly you can force quit him by pressing ctrl+z or just quitting the application your running him on (for example a terminal)

To normally quit Steve just say "Bye" and Steve will quit

Steve can currently only respond to a few questions which have programmed responses because he does not use artificial intelligence to answer

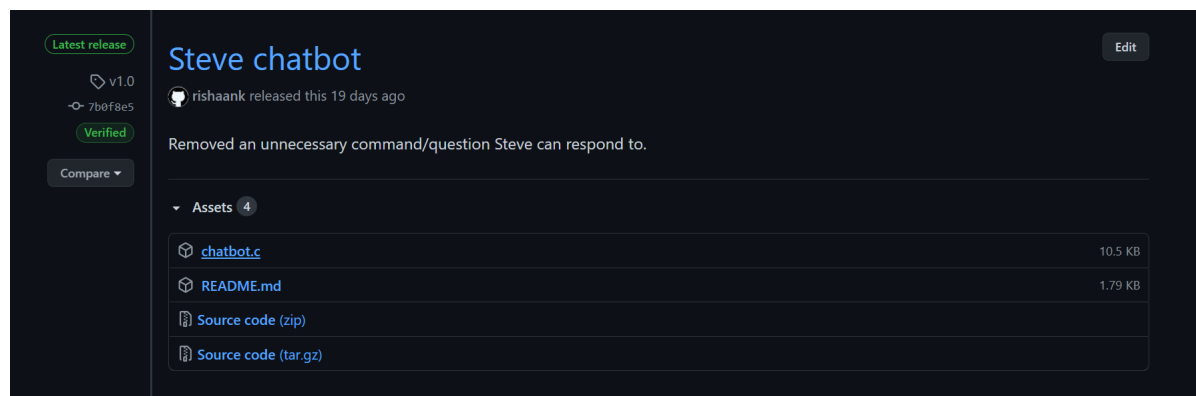

If you have feedback on Steve please submit it [here](#)

## Images

```
Hi! Nice to meet you! What's your name?
Rishaan
Hello Rishaan
TIP: try asking Steve questions like 'What is your favorite food?' to have a conversation with him

How are you doing?
Good
Cool, I'm doing good
What are your hobbies
I occasionally like to draw and paint and I like art. What are your hobbies?
coding
I don't really like coding
What color do you like
Sorry I didn't get that! Could you rephrase your sentence?
What is your favorite color
I like orange. What color do you color like?
Blue
I also like Blue.
Goodbye_
```

**Steve chatbot** Edit

Latest release v1.0 7b0f8e5 Verified Compare

rishaank released this 19 days ago

Removed an unnecessary command/question Steve can respond to.
